Dear Supervisor Pine,

I am concerned about safety of the Highlands community due to the Chamberlain development project. The contractor is stating in the drainage report that he cannot meet all county recommendations.

I understand that complying with the drainage plan was a condition for approval. How is it then that this project can be continuing forward?

I am sure I do not have to remind you that drainage issues caused a landslide on a similarly situated property along Polhemus Road. I am aware as a county tax payer that I had to pay for that mistake.

I am concerned that similar safety issues will arise from this project. I am concerned that this developer will be long gone when that happens and County taxpayers will have to foot the bill to clean up the mess.

What assurances can you provide that the proper processes are being followed, and County has taken appropriate steps to ensure the safety and reasonable ability to recoup any costs for damages that may come down the road?

Gene McKenna
